Hood Positioning Device (HPD):
Telescopic Extraction Arm

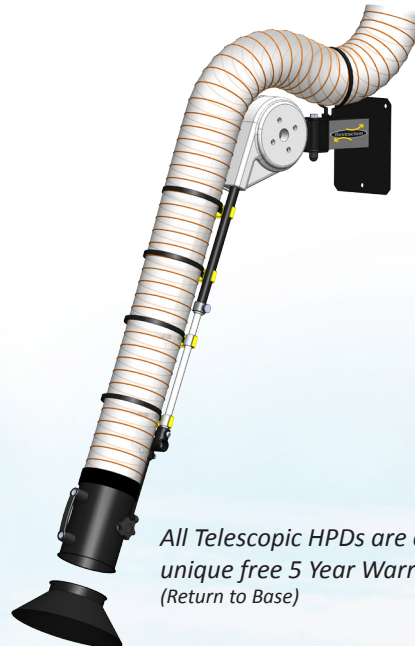

Hood Positioning Device (HPD): Telescopic Extraction Arm

A flexible, self supporting extraction arm, engineered to carry a range of hood and hose combinations.

- Twin supports allow simple fixing of flexible hose in various diameters
- Support clips allow the hose to be easily removed for cleaning & reinstallation
- Increased surface area of all joints gives a lighter feel to the HPD, enabling easier positioning with the HPD self supporting in its required placement
- Rear mechanism is cased for improved safety and hygiene
- Boom at the rear provides the HPD with a 270 degree pivot, improving the working radius
- Integrated damper allows greater control of the airflow in the extraction system
- ATEX compliant and Stainless Steel versions are available

All Telescopic HPDs are offered with a unique free 5 Year Warranty. (Return to Base)

Mounting Brackets:

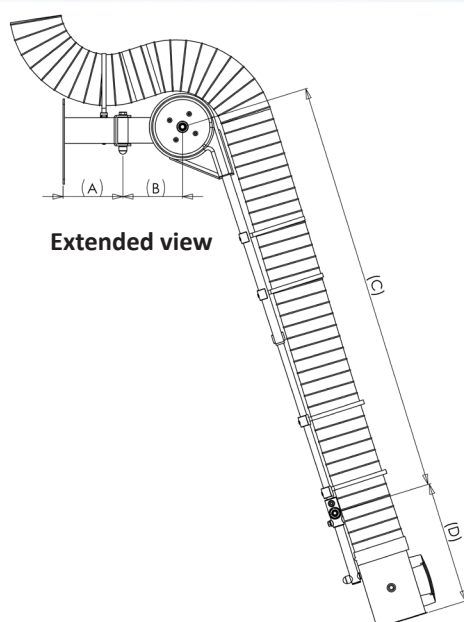

- Standard Wall bracket
- Floor Stanchion
- Ceiling Bracket

Finish:

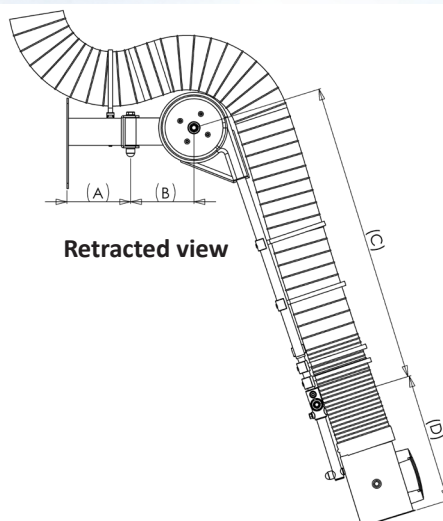

- Polyester Coated Black
- Textured Conductive Black (ATEX)
- Stainless Steel
